

Clark Forklift Part

Clark Forklift Part - At present, there are at least 350,000 Clark forklifts performing globally, and in excess of 250,000 in service in North America alone. With five main lines across the globe, Clark is proud to be one of the most expansive companies in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 specialized parts intended for 20 distinctive models of forklifts and automated equipment. Your local Clark Dealer is your complete source for availability of all your components needs provided by Clark Totalift.

Clark features a exceptional Parts Supply team. The items warehouses are conveniently situated in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their buyers and their sellers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Motivated to provide the highest level of value and service to our users, Clark remains on the leading edge when it comes to enhancing productivity and benefiting performance.

Worldwide, Clark has one of the most outstanding supplier support networks. With over 550 locations globally, seller representation in over 80 nations and 230 locations in North America, their high level of dedication to their clients predominates the materials handling market.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of refinement in the industrial equipment and automated forklift industry. This exceptional dedication to safety is now a customary feature on every forklift.

Clark's recurrent mission to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift producer across the world to be certified with the globally accepted quality standard ISO 9001 for all of their manufacturing plants. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any environmental restrictions, thus placing them in a prevailing market position.

Clark has chosen the structure of "Lean Production" at all of its assembly facilities for the reason that this technique is particularly economical and permits minimal use of resources. Developed to ensure maximum efficiency, this system is designed to discover and acknowledge the most efficient ways for manufacturing facility management. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers join together to perfect the effectiveness and excellence of their products while minimizing expenses. The contemporary value engineering agenda combines innovative product development and delivers improved client support and service within the industry.
